**Who are we and what's the problem?** Following the Grenfell Tower fire, thousands of residential buildings across the UK have been found to have cladding and other fire safety defects branding many homes unsellable whilst leaving leaseholders facing huge remediation bills. UK Cladding Action Group is run by affected leaseholders, formed in 2019 and now are in contact with thousands of leaseholders nationally. We are now the national voice for the thousands of leaseholders.

**Why do we want to hear from you?** Despite some positive steps being made by Government, we believe no leaseholder should have to pay to fix historic defects not of their making. Leaseholders are still facing huge problems and to help end this scandal we need to hear from each and every single leaseholder to ensure every voice is heard.
